

Pelion

Global IoT Connectivity
Made Effortless

No SIM Slot? No Problem.

Global connectivity for eSIM-only devices. Deploy fast, reduce risk, avoid outages, and connect effortlessly with flexible IoT data plans.

Connect More Devices With **Consumer eSIM For IoT**

Consumer Tablets & PCs

Connect consumer devices, tablets or PCs that support cellular eSIM connectivity.

Wearables & Peripherals

From smart watches to trackers to health monitors, Pelion's Consumer eSIM for IoT helps you effortlessly connect more of your things.

Connected Hardware

Network or connected hardware that leverages embedded consumer eSIM SOC.

Pelion Makes It **Effortless**

Without Pelion

✗ Fragmented contracts

Juggling different contracts for your consumer devices means added complexity and cost.

✗ Network lock-in

Relying on a single network operator limits connectivity and exposes your business to coverage gaps, downtime and disruptions when signal strength drops.

✗ Lack of visibility

Remote access to connectivity data is restricted, making it harder to diagnose issues and manage devices efficiently at scale.

With Pelion

✓ One contract, all devices

Simplify everything with a single supplier for all your connectivity needs – from smartphones to sensors.

✓ Flexible global access

Choose from Pelion's network of global operators to find the best one for your needs.

✓ Total visibility & control

Get everything you need to stay on top of your SIM activity straight from the Pelion Portal.

Connecting Your Business That's Our Thing

Embedded eSIMs

Reliable multi-network connectivity. Connect locally or globally with global carrier to 600+ networks.

Powerful Platform

Manage and deploy your eSIMs in one place, with the Pelion Portal. Order and update SIMs, monitor usage, control costs and troubleshoot fast.

Deep IoT Expertise

With 25+ years under our belt, we know IoT inside and out. Get access to expert guidance, 24/7 support and enhanced SLAs to keep you connected.

IoT Security

Flexible security solutions designed to secure endpoints and expanding attack surfaces.

More Devices, Less Friction – Connecting eSIM Is Effortless

Faster deployments

Deploy your IoT devices at scale, instantly. No need for manual swapouts, just scan to activate.

Increased security

Reduce physical security risks and unauthorized device use, with eSIMs that can't be tampered with or stolen.

More visibility, more control

Monitor, manage and troubleshoot your connected devices in one place – for better decision-making.

Smarter, Simpler Deployments For Your eSIM-only Devices

1 Select your preferred operator profile

Get reliably connected locally and globally to the best carrier signal across 600+ networks.

2 Choose your activation method

Scan QR codes, export CSVs of activation codes, or integrate via APIs with your MDM systems.

3 See your SIMs in the Pelion Portal

Get everything you need to stay on top of your SIM activity straight from the Pelion Portal.
