

Global IoT Connectivity Made Effortless

We get your business connected easier than slicing butter with a lava knife. Pelion IoT eSIMs are easy to deploy, manage, secure, and scale. With one portal to manage it all.

Connectivity

Flexible multi-carrier connectivity 600+ networks across 150 countries globally all via a Single IoT eSIM. Managed in one Portal.

Reliability

99.995% reliability with high availability and resiliency so no matter where your devices are, they stay connected.

Security

Secure your IoT devices with advanced security features to detect, mitigate and defend against security breaches and threats.

Expertise

IoT Experts with over 20 years of know how. Ensuring success for our customers. From deployment to growth, on hand 24/7.

Overcome your IoT Challenges

Fed up handling fragmented inflexible network providers and contracts?

With Pelion you get a single provider to manage all your IoT SIMs. One bill and one platform to manage all your connections - with the flexibility to connect how you want, where you want. Simplify how you run your IoT solution and make it easy to scale.

Network lock in, or experiencing coverage issues?

Our Pelion IoT SIMs are eUICC enabled meaning you can seamlessly switch between networks with a single profile. With multicarrier flexibility so you can choose to connect any device, anywhere to 600+ global and local networks all via a Single SIM. Need 4G, 5G, LTE-M or NB-IoT? Don't worry, we can get you connected.

Outages and reliability hampering your business?

With 99.995% service uptime, our connectivity ensures you avoid outages and get the reliability your business needs to thrive. That's the equivalent of 28 minutes of downtime a year, vs a category average of 480 hours! Deliver mission and business critical connectivity with Pelion, without the fear of reputational damage outages can bring.

Concerned about security and managing all those SIMs?

With the Pelion Portal you get the power to manage all your connections and get critical insights. Simplify order management, bulk provisioning, activation and data management in one place. Configure security controls and access with alerts and automations to remain in control of data and costs at all time.

Introducing the Pelion IoT eSIM

Future proofed connectivity, our eUICC enabled IoT SIMs offer the ultimate in performance, resiliency and flexibility.

Connect with our Pelion Plans

Get the most from your connectivity with our Pelion IoT SIM plans. Our flexible options help you to get the very best connectivity security, reliability and expertise from Pelion. Or speak to our team and get a connectivity plan built around your needs.

Most popular

Pelion Essentials

Reliable connectivity starting out on your IoT journey.

- ✓ Access 600+ global & local networks
- ✓ 99.995% reliability
- ✓ eUICC enabled IoT SIMs
- ✓ Pooled data & SIM grouping
- ✓ Supports 4G/ 5G/ LPWAN/ NB-IoT
- ✓ Pelion Portal
- ✓ Inclusive Essential Tier Support
- ✓ Low touch onboarding
- ✓ Customer support portal
- ✓ API access
- ✓ Global IoT roaming support

Pelion Pro

Best for scaling IoT deployments that need security and enhanced support.

Everything in Pelion Essentials plus:

- ✓ Includes Dual IPSec / VPN
- ✓ Pelion Pro Tier support
- ✓ Advanced monitoring & reports
- ✓ Customer success team
- ✓ Custom APN
- ✓ Deployment & migration support

Pelion Enterprise

Best for Enterprises and complex IoT deployments that want rapid response and support.

Everything in Pelion Pro Plus:

- ✓ Advanced monitoring & alerts
- ✓ Includes Enterprise Tier support
- ✓ Quarterly service reviews
- ✓ High touch onboarding
- ✓ Dedicated Account Manager
- ✓ Dedicated escalation contact

Free Trial

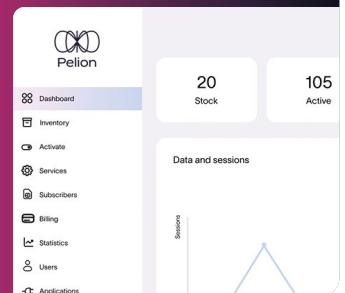

Test Pelion connectivity, with a 30 day free trial that fits around you.

- ✓ Up to 5 free Pelion IoT eSIMs
- ✓ 50MB data limit
- ✓ Pelion Portal
- ✓ 600+ global & local networks
- ✓ Testing support & guidance
- ✓ Customer support portal

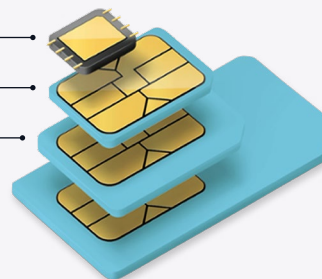

Included

Pelion Portal

Manage your trial SIMs with ease. Order, activate, and provision SIMs at scale. View and download bills, monitor data, and spend. This portal does it all.

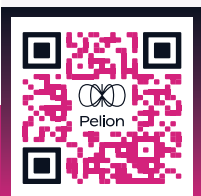

- MFF2 (eSIM)
- 4FF (Nano SIM)
- 3FF (Micro SIM)
- 2FF (Mini SIM)

Pelion eUICC enabled IoT eSIMs

The Pelion IoT eSIM is available in multiple form factors to accommodate a range of devices and technical requirements.
